 - (c) What is servlet ? Write the life cycle of servlet with proper diagram. Also write a program in servlet to perform select operation in database.
 - (d) Discuss various types of data types in MYSQL. Write a PHP code to insert and retrieve data in MYSQL database.
 - (e) What is security threat and attacks. How we can protect our self from these attacks ?

SECTION-C

Note:—Attempt **all** questions. (10×5=50)

3. Attempt any **one** part : (10×1=10)
- (a) Differentiate various types of beans in EJB. Write a program to create a stateful session bean.
 - (b) Write a program to demonstrate Java Message Service (JMS) in message driven beans.
4. Attempt any **two** parts : (5×2=10)
- (a) What is J2EE ? Discuss the architecture and advantages of J2EE in detail.
 - (b) What do you mean by session ? Write a JSP code for creating and accessing session.
 - (c) Write a short note on Java Mail API.

5. Attempt any **one** part : **(10×1=10)**

- (a) (i) Write down the steps to develop and deploy servlet.
- (ii) Write a program in servlet to demonstrate form handling. Give the code of html, web.xml and its java files.
- (b) What is ServletConfig and ServletContext interfaces ? Differentiate them. Also write suitable examples for accessing INIT and CONTEXT parameter.

6. Attempt any **one** part : **(10×1=10)**

- (a) Give the introduction to PHP. What are the benefits of PHP ? Write PHP code to demonstrate array handling (i.e. numeric, associative and multidimensional).
- (b) (i) Write a PHP code to demonstrate file inclusion i.e. include () and require ().
- (ii) Write a PHP code to delete some data from MYSQL database

7. Attempt any **one** part : **(10×1=10)**

- (a) (i) How will you define IT projects and their management in an organization. Describe with diagram.
- (ii) What are the basic services of Internet ? How it can be used as tool for business ?
- (b) Write short notes on :
 - (i) Web Security
 - (ii) Web Browsing.

What is the purpose of the PHP code in the following example?
The code is used to connect to a database and execute a query.

What is the purpose of the PHP code in the following example?
The code is used to connect to a database and execute a query.

What is the purpose of the PHP code in the following example?
The code is used to connect to a database and execute a query.

What is the purpose of the PHP code in the following example?
The code is used to connect to a database and execute a query.

What is the purpose of the PHP code in the following example?
The code is used to connect to a database and execute a query.

What is the purpose of the PHP code in the following example?
The code is used to connect to a database and execute a query.

What is the purpose of the PHP code in the following example?
The code is used to connect to a database and execute a query.

What is the purpose of the PHP code in the following example?
The code is used to connect to a database and execute a query.

What is the purpose of the PHP code in the following example?
The code is used to connect to a database and execute a query.
